

Evolution of the AffloVest®

Continuous innovation has driven improved product performance and market leading technology.

2013 1ST GENERATION	2014 2ND GENERATION	2016 3RD GENERATION	2017 4TH GENERATION	2020 5TH GENERATION
Original controller and travel bag		Controller and travel bag since 2016		

More innovation in seven years than the 30-year history of high frequency chest wall oscillation (HFCWO):

STRENGTH

Vibratory force doubled since the original AffloVest; with three adjustable intensity levels to meet any patient's needs

CONTROLLER

Upgraded from original analog controller to current digital controller with ability to track compliance

ERGONOMICS

Custom fit and 10% weight reduction; AffloVest is the lightest, best-fitting HFCWO vest in the market

BATTERY LIFE

Consistent improvements in battery life; current AffloVest battery can last ~2 hours on the high setting (or ~2-4 days of use)*

My patient can tolerate the highest frequencies of all three settings with the AffloVest feeling more intense on her lungs than her current system...

— PEDIATRIC PULMONOLOGIST AT A CHILDREN'S HOSPITAL

Feel the difference.
