

Discharge your patients with AffloVest.[®] Airway clearance designed to optimize adherence.

Medical equipment used in the hospital may not be optimal for the home. Just like ventilation and oxygen therapies, airway clearance has evolved to encourage daily use at home.

Considerations for airway clearance in the home:

- Delivers therapy throughout all affected areas of the lung
- Fully portable to fit with daily activities and travel
- Compact so it does not take up too much space in the home¹
- Minimizes noise which is a frequent complaint by patients¹
- Comfortable fit encourages lifelong daily use to keep patients out of the hospital and off antibiotics²

AffloVest mobile airway clearance therapy.

Frees patients. Mobilizes secretions. Advances therapy.

AffloVest is designed to fit into patients' lives while optimizing therapy adherence. Its lightweight and portable design gives patients freedom and mobility to perform their therapy without the limitations of traditional airway clearance vests.

Provide AffloVest in the home to clear the way for improved respiratory health.

Feel the difference.
