Airway Clearance Therapy Tried and Failed. This must be documented in the patient's progress notes.

1. Have alternative airway clearance techniques been **tried and failed**? YES NO
Please indicate methods of airway clearance patient has tried and failed (check all that apply):
 CPT (manual or percussor) Oscillating PEP (Flutter, Acapella, Aerobika, Pep Valve, Pep Mask)
 Huff coughing Breathing techniques Mucomyst*
 Hypertonic saline Suctioning (*Notes must document it is prescribed for secretion mobilization)
2. Check all reasons why the above therapy failed, is contraindicated or inappropriate for this patient:
 Cannot tolerate positioning/hand CPT Too fragile for hand CPT Did not mobilize secretions Other
 Physical limitations of caregiver Caregiver unable to perform adequate CPT Insufficient expiratory force
 Gastroesophageal reflux (GERD) Severe arthritis, osteoporosis Resistance to therapy
 Cognitive level Unable to form mouth seal Artificial airway
3. For Cystic Fibrosis or Neuromuscular patients, the following must be documented in the patient's progress notes. Please attach records with Rx.
 Documentation supporting diagnosis Tried and failed a lesser airway clearance technique indicated above
4. For Bronchiectasis patients, please check Yes or No to the following question:
Has there been a CT scan confirming Bronchiectasis diagnosis? YES NO If "Yes" please include copy of CT scan interpretation.
In addition, the following medical history in the past year must be documented in the patient's progress notes. Please attach records with Rx.
 3 or more exacerbations, i.e., lung infections, requiring antibiotics, documented at least 3 separate times
OR
 Daily productive cough for at least 6 continuous months

I certify the accuracy of this Rx for the AffloVest Airway Clearance System and that I am the physician identified in this form. I certify that the medical information provided above and in the supplementary documentation is true, accurate, and completed to the best of my knowledge. The patient record contains the supplementary documentation to substantiate the medical necessity of the AffloVest and physician notes will be provided to the authorized AffloVest distributor by request. By providing this form to an authorized AffloVest distributor, I acknowledge that the patient is aware that he or she may be contacted by said distributor for any additional information to process this order.

*AffloVest requires a doctor's prescription for treatment by High Frequency Chest Wall Oscillation (HFCWO). The AffloVest has received the FDA's 510k clearance for U.S. market availability, and is approved for Medicare, Medicaid and private health insurance reimbursement under the Healthcare Common Procedure Coding System (HCPCS) code E0483 - High Frequency Chest Wall Oscillation. The AffloVest is also available through the U.S. Department of Veterans Affairs/Tricare. Patients must qualify to meet insurance eligibility requirements.

Durable Medical Equipment companies are ultimately responsible for ensuring that the reimbursement criteria for a specific insurance plan and patient situation are satisfied.

Medicare Approved ICD-10 Codes for AffloVest HFCWO Therapy (HCPCS E0483)

Medicare Requirements for Bronchiectasis:

1. Required: CT Scan confirming diagnosis of bronchiectasis.

AND

2. Required: Daily productive cough for at least 6 continuous months.

OR

Frequent (i.e. more than 2/year) exacerbations requiring antibiotic therapy.

AND

3. Required: Documentation (chart notes) of another treatment tried to mobilize secretions and clearly indicating the other technique or device has failed.

ICD-10 CODE DESCRIPTION

J47.0	Bronchiectasis with acute lower respiratory infection
J47.1	Bronchiectasis with (acute) exacerbation
J47.9	Bronchiectasis, uncomplicated
Q33.4	Congenital bronchiectasis

Medicare Requirements for Other Respiratory, Cystic Fibrosis and Neuromuscular Conditions*:

Physician's order that includes: AffloVest prescription, qualifying Dx, chart notes to support the Dx and well-documented failure of standard treatments to adequately mobilize retained secretions.
