

For patients with recurring pneumonia and frequent lung infections? AffloVest can help.

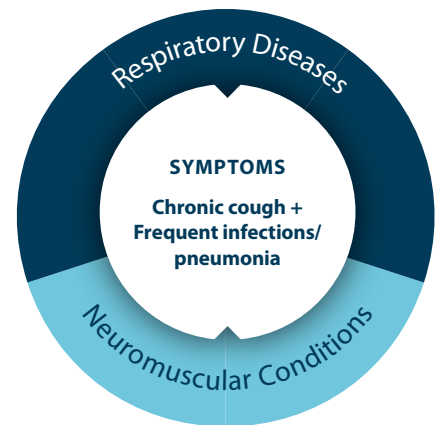

Who can benefit from airway clearance therapy?

Patients who:

- Can't clear mucus because of pneumonia or frequent lung infection.
- Unable to produce an effective cough.

Chronic respiratory issues can lead to complications and hospitalizations.

Getting an accurate diagnosis for your patients who suffer from chronic airway diseases can be challenging because the symptoms often overlap. Despite the similarities, each disease has a unique impact on lung function, acute exacerbations, and mortality.¹ Depending on the disease, treatment can vary. A complete diagnosis will allow you to create the best care plan to improve your patients' quality of life.²

Prescribe AffloVest: the effective, patient-preferred therapy that's more user friendly than ever.³

AffloVest provides a preventative treatment option for your at-risk respiratory patients proven to reduce hospitalizations, emergency visits, and antibiotic usage.⁴

AffloVest is designed to help loosen and clear excess mucus, allowing your patients to breathe easier and maintain respiratory health. It can be used at home, work, or on the go, fitting your patients' lifestyles and promoting therapy adherence. In a recent study, 93% of patients preferred AffloVest over bladder-style vests for comfort, lifestyle, and travel use.¹

Tactile Medical is a leader in developing at-home therapies for people suffering from underserved, chronic conditions including bronchiectasis, neuromuscular disorders and cystic fibrosis by helping them live better and care for themselves at home.

Visit afflovest.com to prescribe our patient-preferred therapy.

Individual results may vary.

Indications/contraindications: Indications, contraindications, warnings, and instructions for use can be found in the product labeling supplied with each device.

Caution: Federal (U.S.) law restricts this device to sale by or on the order of a licensed healthcare practitioner.
